DM15USB

RECORDING SOLUTIONS FOR MODERN CREATORS

Your voice, with professional quality.

XLR Podcast Microphone with 192kHz USB Interface
DM15USB is the dynamic microphone designed for those who demand a clear, present, and professional voice in a simple and immediate way. Perfect for podcasts, live streaming, voice-over, content creation, home recording, and advanced vocal applications, it combines the convenience of direct USB connection to PC or Mac with the robustness of a balanced XLR output. This dual connectivity offers a complete solution: ideal for beginners wanting instant results, but also for professionals needing a reliable

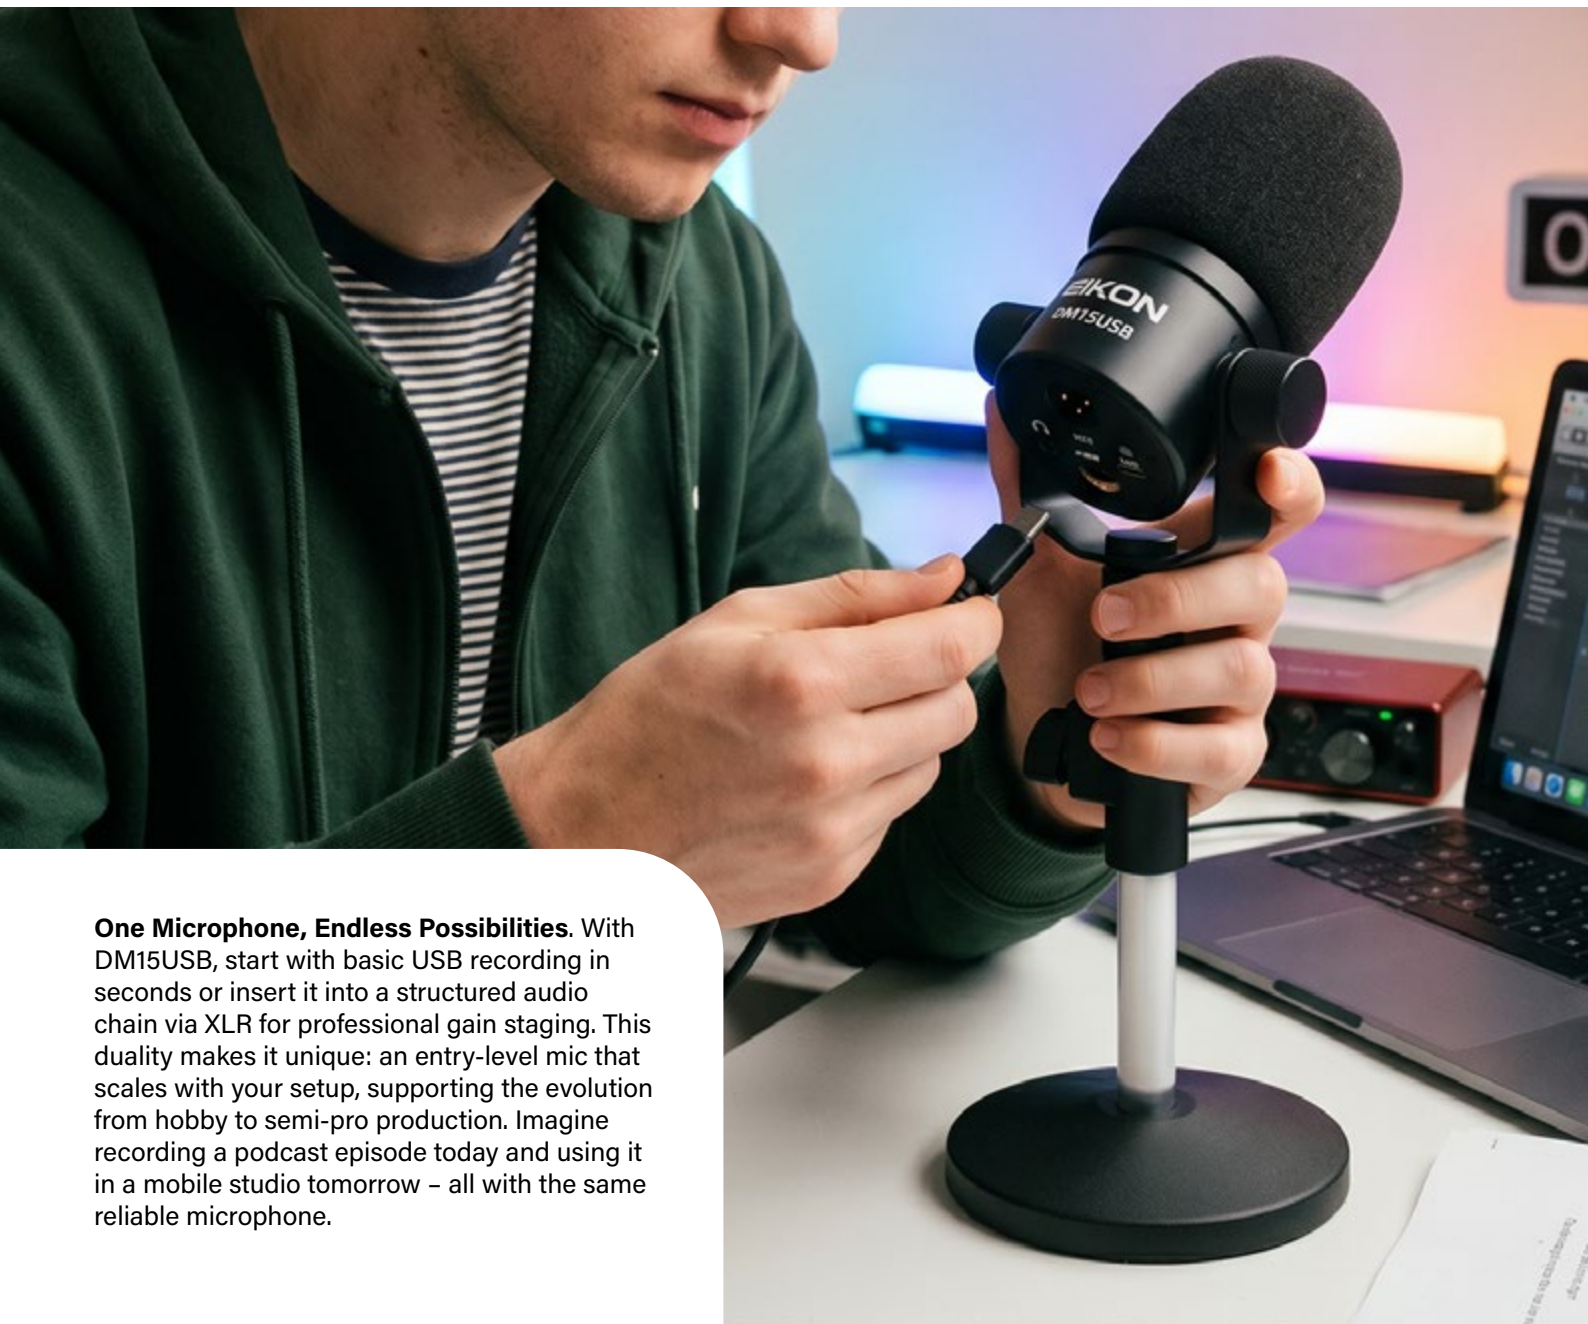

tool in high-level productions.

Equipped with a high-definition integrated USB interface up to 192kHz/24bit, DM15USB captures every detail and natural nuance of the voice, minimizing background noise and drastically reducing reliance on external gear like dedicated audio interfaces. The result? A simplified, plug-and-play workflow that speeds up content production without sacrificing quality. It's part of the EIKON recording line, a complete range dedicated to home recording, podcasting, and professional monitoring, designed to meet the needs of modern creators and home studios.

EIKON

WHY CHOOSE DM15USB

- **Dual USB + XLR Connection:** Connect directly to the computer for instant recordings or integrate into professional setups with mixers, consoles, and audio interfaces. Supports both digital and analog environments without compromise.
- **High-Resolution Audio up to 192kHz/24bit:** Precise sampling for faithful, detailed reproduction that enhances presence, intelligibility, and vocal dynamics – essential for clean post-production editing.
- **Designed for Podcasting and Spoken Voice:** Optimized cardioid pattern reduces echoes and lateral noises, delivering broadcast-ready clarity even in untreated acoustic environments.
- **Versatile in Every Context:** Excels in podcasts, live streams on platforms like Twitch or YouTube, remote interviews, online lessons, dubbing, business presentations, and solo vocal recordings.
- **Simple and Immediate Workflow:** Zero USB latency, onboard adjustable gain, and robust metal design for long sessions and hassle-free portability.

One Microphone, Endless Possibilities. With DM15USB, start with basic USB recording in seconds or insert it into a structured audio chain via XLR for professional gain staging. This duality makes it unique: an entry-level mic that scales with your setup, supporting the evolution from hobby to semi-pro production. Imagine recording a podcast episode today and using it in a mobile studio tomorrow – all with the same reliable microphone.

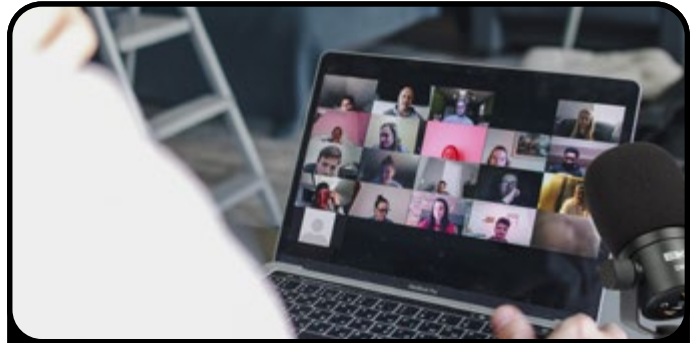

EIKON

IDEAL FOR:

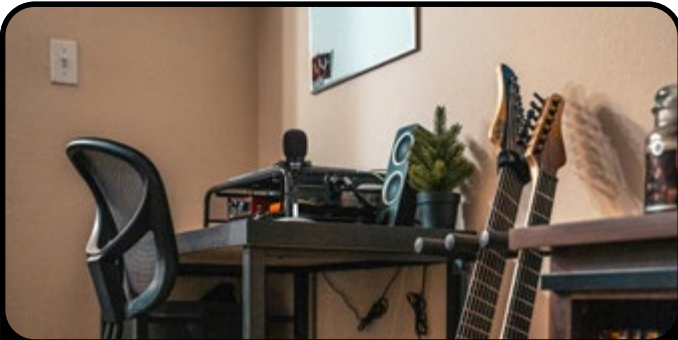

PODCAST

Podcaster seeking a defined, professional voice ready for distribution on Spotify or Apple Podcasts.

SPEAKER

Speakers, Teachers, and Professionals producing lessons, webinars, online courses, or vocal content for educational platforms.

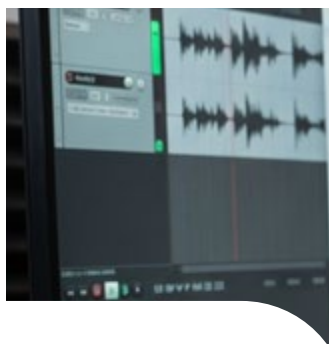

HOME STUDIO

Home Studios needing a versatile, compact, and immediate microphone for demos, jingles, or quick vocal tracks.

STREAMER

Creators and Streamers who want to elevate audio quality to stand out in a saturated market, attracting more viewers and sponsors.

DM15USB takes your voice content to the next level: a podcast microphone with balanced XLR output and integrated 192kHz USB interface, engineered for high-quality recordings, maximum versatility, and plug-and-play use. The smart choice for pro, clear, always-ready audio – sell it to your customers as the essential upgrade for 2026.
